

BORA Basic

BORA Basic highlights

Oversized 4 24 cooking surface

Thanks to the central operating panel by the extractor, no space is taken up by controls on the cooktop, and there is room to cook with four pots measuring up to 24 cm at the same time.

Minimum volume

Thanks to the quiet fan, the extractor remains barely audible even at high power levels.

Maximum storage space

At under 200 mm, the low installation height and integrated recirculation unit guarantee maximum storage space for pots, pans and other kitchen utensils in the cupboard below.

Compact size

Due to its compact dimensions, the system fits into almost any kitchen, even small ones, and creates room for additional wall units by eliminating the extractor hood.

Easy installation

All BORA cooktop extractor systems have been optimised for quick, easy and error-free installation.

BORA Basic highlights

Genuine stainless steel grease filter

Compared to other commonly used filter materials, the stainless steel grease filter will not perish with ongoing cleaning in the dishwasher, retaining its original appearance (no yellowing) and stability.

Simple cleaning

All parts that come into contact with cooking vapours can be easily removed through the inlet opening and put in your dishwasher for fuss-free cleaning.

Integrated drip tray

If anything is spilt during cooking, the integrated drip tray safely catches both solids and liquids.

Pause function

With the pause function all cooking zones can be quickly and easily deactivated temporarily. When the function is cancelled, the previous settings are restored.

Child-lock

The child-lock prevents the cooktop from being switched on unintentionally or without permission.

A combined cooktop and extractor system.

Our all-rounder provides the perfect combination of a high-performance cooktop and a highly effective cooktop extractor: for more ambitious, more attractive and quieter cooking, easier cleaning and optimal room design – all the while offering the best space-saving options. Our promise: even smaller kitchens can achieve professional standards. Compact design for every kitchen.
